

DHANYA DWIVEDI

Greater Noida, Uttar Pradesh, India | (+91) 9621868986

Portfolio | dhanyadwivedi170304@gmail.com | [linkedin.com/in/dhanya-dwivedi](https://www.linkedin.com/in/dhanya-dwivedi) | github.com/dhanya-017

PROFESSIONAL SUMMARY

Final-year Computer Science Engineering student (Class of 2026) with hands-on experience in full-stack software development, system design, and testing. Strong foundation in data structures, object-oriented programming, clean code principles, and SDLC. Experienced in working within collaborative, cross-functional environments and adapting quickly to new technologies. Highly motivated to grow through rotational graduate programs across software engineering, data, cloud, and DevOps domains.

EDUCATION

Noida Institute of Engineering & Technology

Bachelor of Technology in Computer Science Engineering | CGPA: 7.7/10

Greater Noida, India

July 2022 – July 2026

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Operating Systems, Computer Networks, Object-Oriented Programming, Software Engineering

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, TypeScript, SQL

Software Development: Object-Oriented Programming, Clean Code, Design Patterns, RESTful APIs

Frameworks & Tools: React.js, Node.js, Express.js, Spring Boot, Django

Databases: PostgreSQL, MongoDB, MySQL, Oracle

Testing & Quality: Unit Testing, Debugging, Code Reviews, Test Data Creation

DevOps & Systems: Git, Linux, CI/CD basics, Deployment Validation

Core Concepts: SDLC, Agile Methodologies, Data Structures & Algorithms

PROFESSIONAL EXPERIENCE

Business Curative

MERN Stack Developer (Part-Time)

Delhi, India

January 2026 – Present

- Optimizing and enhancing an existing e-commerce platform built on the MERN stack to improve performance, scalability, and reliability
- Implementing feature improvements, refactoring code, and resolving production issues based on change requests
- Managing application deployments, environment configurations, and post-deployment validation
- Conducting unit testing, debugging, and performance tuning to ensure smooth production delivery
- Collaborating with cross-functional teams to support continuous improvement and customer-focused enhancements

Business Curative

MERN Stack Developer Intern

Delhi, India

September 2025 – December 2025

- Designed and developed a full-featured e-commerce platform from scratch using the MERN stack
- Implemented core modules including product catalog, cart management, authentication, and order workflows
- Built RESTful APIs and integrated frontend with backend services and databases
- Performed initial testing, bug fixing, and documentation to support production readiness

TECHNICAL PROJECTS

Eatalyzer – AI-Powered Food Scanner

- Developed a full-stack application to analyze food images and compute nutritional insights
- Applied machine learning models and validated outputs for accuracy and performance
- Built backend services and APIs supporting real-time data processing
- Performed testing, optimization, and performance tuning

Travel Planner & Booking Application

- Built enterprise-style booking system using Java, Spring Boot, and JDBC
- Implemented thread-safe logic ensuring system reliability and data consistency
- Created technical documentation, test cases, and executed unit testing
- Integrated third-party APIs and authentication mechanisms

ACHIEVEMENTS & LEADERSHIP

Solved 300+ problems in Data Structures and Algorithms across competitive programming platforms

Vice President – NIET Alma Mater Club: Led teams, coordinated events, and managed stakeholders

Content Writer Head – Khushiyan Baaton Club: Strengthened documentation and communication standards

IEEE Student Member: Active participant in technical workshops and seminars
