

DHANYA DWIVEDI

Greater Noida, Uttar Pradesh, India | (+91) 9621868986

Portfolio | dhanyadwivedi170304@gmail.com | linkedin.com/in/dhanya-dwivedi | github.com/dhanya-017

PROFESSIONAL SUMMARY

Final-year Computer Science Engineering student (Class of 2026) with hands-on experience in full-stack software development and backend engineering. Strong foundation in data structures, algorithms, object-oriented programming, RESTful APIs, databases, and SDLC. Proven ability to build, test, optimize, and deploy production-grade applications while collaborating in Agile, cross-functional teams. Actively seeking Software Engineer / Software Developer roles.

EDUCATION

Noida Institute of Engineering & Technology

Bachelor of Technology in Computer Science Engineering | CGPA: 7.63/10

Greater Noida, India

July 2022 – July 2026

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Operating Systems, Computer Networks, Object-Oriented Programming, Software Engineering

TECHNICAL SKILLS

Programming Languages: Java, Python, JavaScript, TypeScript, SQL

Frontend: React.js, HTML5, CSS3, Tailwind CSS, Redux

Backend & APIs: Node.js, Express.js, Spring Boot, RESTful APIs, Authentication & Authorization

Databases: PostgreSQL, MySQL, MongoDB

Computer Science Fundamentals: Data Structures & Algorithms, OOP, Design Patterns, Time & Space Complexity

Tools & Engineering Practices: Git, Postman, Unit Testing, Debugging, Code Reviews, SDLC, Agile, CI/CD fundamentals

PROFESSIONAL EXPERIENCE

Business Curative

Software Engineer (Part-Time)

Delhi, India

January 2026 – Present

- Optimized and enhanced production e-commerce features, improving API response times by approximately 15%
- Refactored backend and frontend components to reduce technical debt and improve scalability and reliability
- Designed and implemented RESTful APIs supporting core business workflows
- Performed unit testing, debugging, and deployment validation to ensure stable releases
- Collaborated with cross-functional stakeholders in an Agile development environment

Business Curative

Software Engineering Intern (MERN Stack)

Delhi, India

September 2025 – December 2025

- Designed and developed a full-featured e-commerce application using the MERN stack
- Implemented authentication, product catalog, cart, and order management workflows
- Built and integrated RESTful APIs with frontend components and databases
- Optimized database queries and resolved recurring issues during testing cycles

TECHNICAL PROJECTS

Eatalyzer – AI-Powered Food Scanner | React, TypeScript, PostgreSQL, TensorFlow, OpenCV

- Built a full-stack application to analyze food images and compute calorie intake and nutritional insights
- Integrated TensorFlow-based deep learning models with OpenCV for image preprocessing and food recognition
- Designed scalable backend services and optimized database queries for performance and reliability
- Implemented RESTful APIs delivering real-time nutrition data to frontend consumers

Travel Planner & Booking Application | Java, Spring Boot, JDBC

- Developed an enterprise-style booking system using Java and Spring Boot
- Implemented thread-safe booking logic to ensure data consistency under concurrent access
- Integrated third-party REST APIs for flight and hotel data
- Created unit tests and validated core workflows for system reliability

ACHIEVEMENTS & LEADERSHIP

Solved 300+ Data Structures and Algorithms problems across competitive platforms

Vice President – NIET Alma Mater Club: Led teams, coordinated initiatives, and managed stakeholders

Content Writer Head – Khushiyan Baaton Club: Improved documentation quality and communication standards

IEEE Student Member: Active participant in technical workshops and seminars
